PSI™ ~ ENVIRONMENTAL BENEFITS

- PSI™ plastic frames are made from 50% post-consumer recycled plastics.
- PSI™ packaging is 100% recycled.
- PSI™ uses no throw away ink pads.

Water bottles are made from PET plastic and Shiny has found an alternative to putting them in a landfill. Did you know major US retailers are banning the use of PET plastic used for clam shell packaging? The reason for such is that PET plastic does not biodegrade well. We are thrilled to be helping the environment when selling our stamps. Also, the PET-843 and 844 come with a removable die plate. This enables the consumer to have multiple impressions with one stamp, or allows them to keep their original stamp when their message changes.....another Shiny exclusive.

CUSTOM FILEBACKS

Please contact us for more information and pricing on Filebacks.

Pro Stamps can produce these and install them in your folders, or folders we provide for you.

Fileback Dividers make organization of large file folders simpler and more efficient. Individual fasteners on each divider provides the ability to add or delete to any section without disturbing information in other sections. This allows for a more efficient and accurate filing system. Fileback Dividers have several standard features, enabling individuals to match with the current filing system.
